

**Listing of Claims**

1. (Currently amended) A transformed cell comprising:  
~~beta-alanine/pyruvate aminotransferase activity, wherein the cell comprises an exogenous~~  
nucleic acid molecule encoding a beta-alanine/pyruvate aminotransferase having at least 90% sequence identity to SEQ ID NO: 20, wherein the beta-alanine/pyruvate aminotransferase is capable of producing malonate semialdehyde and alanine from beta-alanine and pyruvate, and  
an exogenous nucleic acid molecule encoding an alanine 2,3-aminomutase, wherein the alanine 2,3-aminomutase is capable of producing beta-alanine from alpha-alanine, and wherein the cell produces 3-hydroxypropionic acid (3-HP) from beta-alanine.
2. (Currently amended) The transformed cell of claim 1, wherein the exogenous nucleic acid molecule encoding the beta-alanine/pyruvate aminotransferase comprises a sequence having at least 90% sequence identity to SEQ ID NO: ~~17 or~~ 19.
3. (Currently amended) The transformed cell of claim 1, wherein the exogenous nucleic acid molecule encoding the beta-alanine/pyruvate aminotransferase comprises SEQ ID NO: ~~17 or~~ 19.
4. (cancelled)
5. (Original) The transformed cell of claim 1, wherein the cell further comprises dehydrogenase activity capable of converting malonate semialdehyde to 3-HP.
6. (Original) The transformed cell of claim 5, wherein the cell further comprises an exogenous nucleic acid molecule encoding a dehydrogenase capable of converting malonate semialdehyde to 3-HP.
7. (Original) The transformed cell of claim 6, wherein the dehydrogenase is a 3-hydroxypropionate dehydrogenase.

8. (Original) The transformed cell of claim 7, wherein the exogenous nucleic acid molecule encoding the 3-hydroxypropionate dehydrogenase comprises a sequence having at least 90% sequence identity to SEQ ID NO: 27.

9. (Original) The transformed cell of claim 8, wherein the exogenous nucleic acid molecule encoding the 3-hydroxypropionate dehydrogenase comprises SEQ ID NO: 27.

10. (Original) The transformed cell of claim 7, wherein the 3-hydroxypropionate dehydrogenase comprises SEQ ID NO: 28.

11. (Cancelled)

12. (cancelled)

13. (Currently amended) The transformed cell of claim 1[[2]], wherein the exogenous nucleic acid molecule that encodes an alanine 2,3-aminomutase comprises a sequence having at least 90% sequence identity to SEQ ID NO: ~~21, 23 or 25~~ and the alanine 2,3-aminomutase is capable of producing beta-alanine from alpha-alanine.

14. (Currently amended) The transformed cell of claim 13, wherein the exogenous nucleic acid molecule that encodes an alanine 2,3-aminomutase comprises SEQ ID NO: ~~21, 23 or 25~~.

15. (Currently amended) The transformed cell of claim 1[[2]], wherein the alanine 2,3-aminomutase comprises SEQ ID NO: ~~21, 23 or 26~~.

16. (Original) The transformed cell of claim 1, wherein the cell is a prokaryotic cell.

17. (Original) The transformed cell of claim 16, wherein the prokaryotic cell is a *Lactobacillus*, *Lactococcus*, *Bacillus*, or *Escherichia* cell.

18. (Original) The transformed cell of claim 1, wherein the cell is a yeast cell, plant cell, or fungal cell.
19. (Original) A plant comprising the transformed plant cell of claim 18.
20. (Previously Presented) The transformed cell of claim 1, wherein the cell further comprises lipase or esterase activity, or a combination thereof.
21. (Original) The transformed cell of claim 20, wherein the cell further comprises an exogenous nucleic acid molecule encoding a lipase or an esterase.
22. (currently amended) The transformed cell of claim 1, wherein the cell further comprises:  
3-hydroxypropionate dehydrogenase activity;  
~~alanine 2,3-aminomutase activity;~~ and  
lipase or esterase activity.
23. (Previously Presented) The transformed cell of claim 20, wherein the transformed cell produces an ester of 3-HP.
24. (Original) The cell of claim 23, wherein the ester of 3-HP is methyl 3-hydroxypropionate, ethyl 3-hydroxypropionate, propyl 3-hydroxypropionate, butyl 3-hydroxypropionate, or 2-ethylhexyl 3-hydroxypropionate.
25. (Previously Presented) The transformed cell of claim 1, wherein the cell further comprises aldehyde dehydrogenase activity and alcohol dehydrogenase activity.
26. (Original) The transformed cell of claim 25 wherein the cell further comprises an exogenous nucleic acid molecule encoding an aldehyde dehydrogenase and an exogenous nucleic acid molecule encoding an alcohol dehydrogenase.

27. (Currently amended) The transformed cell of claim 1, wherein the cell further comprises:  
3-hydroxypropionate dehydrogenase activity;  
~~alanine 2,3-aminomutase activity;~~  
aldehyde dehydrogenase activity; and  
alcohol dehydrogenase activity.
28. (Previously Presented) The transformed cell of claim 25, wherein the transformed cell produces 1,3-propanediol.
29. (Previously Presented) The transformed cell of claim 1, wherein the cell further comprises esterase activity.
30. (Original) The transformed cell of claim 29, wherein the cell further comprises an exogenous nucleic acid molecule encoding an esterase.
31. (Currently amended) The transformed cell of claim 1, wherein the cell further comprises:  
3-hydroxypropionate dehydrogenase activity;  
~~alanine 2,3-aminomutase activity;~~ and  
esterase activity.
32. (Previously Presented) The transformed cell of claim 29, wherein the transformed cell produces polymerized 3-HP.
33. (Previously Presented) A method for making 3-HP from beta-alanine, comprising culturing the transformed cell of claim 1 under conditions that allow the transformed cell to make 3-HP from beta-alanine.
34. (Cancelled)
35. (Original) The method of claim 33, wherein the cell is a prokaryotic cell.

36. (Previously Presented) A method of producing an ester of 3-HP, comprising culturing the transformed cell of claim 20 under conditions wherein the transformed cell produces an ester of 3-HP.

37. (Original) The method of claim 36, wherein the ester of 3-HP is methyl 3-hydroxypropionate, ethyl 3-hydroxypropionate, propyl 3-hydroxypropionate, butyl 3-hydroxypropionate, or 2-ethylhexyl 3-hydroxypropionate.

38. (Previously Presented) A method of producing 1,3 propanediol, comprising culturing the transformed cell of claim 25 under conditions wherein the transformed cell produces 1,3 propanediol.

39. (Previously Presented) A method of producing polymerized 3-HP, comprising culturing the transformed cell of claim 29 under conditions wherein the transformed cell produces polymerized 3-HP.

40. (Currently amended) A method for making 3-HP, comprising:  
~~transfecting the transformed cell of claim 1 with a nucleic acid molecule encoding a polypeptide comprising alanine 2,3-aminomutase activity; and~~  
culturing the transfected cell to allow the transfected cell to make 3-HP.

41. (Original) A transformed cell comprising:  
endogenous beta-alanine/pyruvate aminotransferase activity; and  
an exogenous nucleic acid molecule encoding an alanine 2,3, aminomutase, wherein the cell produces 3-HP.

42. - 65. (cancelled)

66. (new) The transformed cell of claim 1, wherein the alanine 2,3-aminomutase comprises at least 90% sequence identity to SEQ ID NO: 26 and is capable of producing beta-alanine from alpha-alanine.

67. (new) The transformed cell of claim 1, wherein the cell does not express lactate dehydrogenase.
